WHAT TO BRING

Fishing for Arctic char, Atlantic Salmon and Sea Run Brook Trout in Nunavik, Northern Quebec.

Arctic Char migrate to Ungava Bay after ice out where they spend the summer feeding heavily before running up local rivers to spawn. There they cruise around the bay's and many islands hunting for sand eels, shrimp and krill. Flies and lures selected should imitate these prey.

FLY FISHING

RODS : We recommend 9 or 9'6 foot 8-9 weight fast action rods

REELS : Large arbor with a strong drags and a minimum of 100 yards of backing

LINES : Fast sinking from 250 to 450 grains and floating with sinking leaders. if you can have different spools.

LEADER : 12 to 20 lbs tippet mono or Fluoro

FLIES: S3 sculpin, Woolly buggers, double bunnies, Puglisi shrimp, Millbrook streamer, Bunny leech some with cone heads or Clousers type. (Olive, chartreuse, purple, white and pink)

We use only single and barbless hooks. Saltwater hooks are recommended.
Flies with upward hooks and trailer are more effective and injure less fish.
Flies are sold at the Lodge

SPINNING

RODS : medium / heavy action for lures up to 1 ounce

REELS : medium duty for 15 to 25 lbs line

LURES : Pixie #4 (silver-orange, gold-orange, chartreux, gold-green), Crocodile 100 silver reflex, Mepps Syclops, Buzz bombs chrome, 3D Sandeel. sandeel.
Good quality stainless steel swivels and saltwater single hooks.

CLOTHES

The average temperatures are 11oc (51F) to 16 oc (61F) but can drop to 2oc (36F) or rise to 24 oc (76F). In these Arctic conditions dressing in warm layers is important.
